verify information and trim data. API 600 TRIM CHART - hektomuhendislik.com.tr The trim of a valve is the set of replaceable parts of a valve. The trim shall be selected carefully, depending on process parameters as fluid, working temperature / pressure and valve type. The API 600 norm defined standard numbers to indentify the trim in terms of combinations of materials for the replaceable parts of the valve. API 600 TRIM ... VALVE TRIM MATERIALS, API 600 TRIM CHART / API Trim Chart ... Trim Number. Removable/replaceable ,functional parts of the valve that are exposed to the flow medium such as stem,closure member and seating surfaces is termed as trim.(Valve body,bonnet,yoke does not include

in trim) The number corresponding to material used in API 600 and API 602 are termed as Trim Numbers API Trim Table - Piping Study A Valve's trim performance is determined by the disk and seat interface and the relation of the disk position to the seat. Because of the trim, basic motions and flow control are possible. In rotational motion trim designs, the disk slides closely past the seat to produce a change in flow opening.
