Electronic Flight Instrument System Efis An Electronic Flight Instrument System (EFIS) is a flight deck instrument display system in which the display technology used is electronic rather than electromechanical. Early EFIS systems portray information using cathode ray tube (CRT) technology. Later instrument displays are presented on multi-colour liquid-crystal display (LCD) screens, which replace some or all of the conventional flight instruments for both pilots. Electronic Flight Instrument System - SKYbrary Aviation Safety The G5 electronic flight instrument delivers exceptional performance, reliability and ease of installation as a drop-in replacement for primary attitude and/or directional gyros in type-certificated fixed-wing aircraft. For select aircraft equipped with G500 or G500 TXi, G5 can also be used as a standby flight instrument to those systems. Providing an economical upgrade path via a comprehensive approved model list (AML), the compact and cost-effective G5 is bringing modern “glass cockpit ...
