Books & Tools | Haag Education Haag Certified Inspector Program Become a damage assessment pro through our industry-changing

Certification programs. Haag Engineers and our seasoned instructors teach you advanced damage assessment techniques related to Residential Roofs, Commercial Roofs, or Wind Damage Assessment (building envelope). view Haag Certified Inspector Program Haag Certified Inspector The assessment procedure is based on determining whether there is hail-caused damage and if so, quantifying the amount of damage on each roof slope. It also involves determining whether repair of individual shingles or shakes or roof system replacement on an entire slope (or roof) is the economical choice. Proceedings of the North American Conference on Roofing ... Our Engineers will investigate damage to roofs due to

design problems, construction deficiencies, excessive loading, weather and seismic events, mechanical damage, maintenance issues and other causes. Haag has a nearly century-long track record of analyzing damage caused by weather phenomena, including hail, snow, ice, wind, storm surge, flooding, lightning, tornadoes, and hurricanes. Roofing | Haag Engineering

**ASSESSING HAIL DAMAGE** Accurate assessment of hail damage is a step by step process that involves an examination of the roof shingles as well as other objects on and around the roof. Marshall and Herzog (1999) presented a methodology on how to quantify hail damage to a roof through the use of test squares.
