The scripting and debugging engine leverages data extensions and correlation studio to reduce the time spent scripting. LoadRunner: Application Load Testing Tools | Micro Focus This function assigns a value to the LR parameter/variable. It takes two attributes – The first attribute is the source (C String) and the second attribute is the destination (LR parameter/variable). So this function saves the

value of the C variable that we defined into the LR parameter 'LRPlanName'. LoadRunner VuGen Scripting Challenges Each style of Osborn Load Runners was originally developed as a "special" to satisfy the requirements of extraordinary loads and severe environments.
